

LO: to create an alternative event to a dilemma

Danny has a car accident.

Danny didn't have time to think. He jumped into the car parked in the garage and switched on the engine. Slowly, Danny pulled out onto the road and crawled along without the lights on. He was feeling very scared and worried about his driving skills as he could only just see over the steering wheel. Suddenly, there were brilliant, bright lights blinding his vision. He swerved off the road and crashed into the hedge that ran along the side. As Danny sat there, feeling dazed and confused, he saw a shadowy figure approaching the car. Panic began to sweep through his body.
