

Multiplication circle

What you need: someone to call the numbers and 10 items.

How to play:

- Place the items in a large circle.
- The player begins in the middle of the circle.
- Someone calls a number between 1 - 10. The player must collect the number of items called from the outside of the circle and place them in the middle of the circle.
- Players can only move one item at a time.
- After a few rounds make this harder by adding a multiplication question to the game e.g. 7 would mean the player must place 7 items in the centre of the circle leaving three on the outside. The player must then call the answer to 7×3 . They return all the items to the outside to begin again.

$$7 \times 3 = 21$$

How quickly can you move the items?
