

Measuring with a protractor (1)

1 Circle the greater angle in each pair.

a)

b)

c)

d)

2

I think angle A is bigger than angle B.

angle A

angle B

Explain the mistake Tommy has made.

3

List the angles in order of size. Start with the smallest.

A

C

B

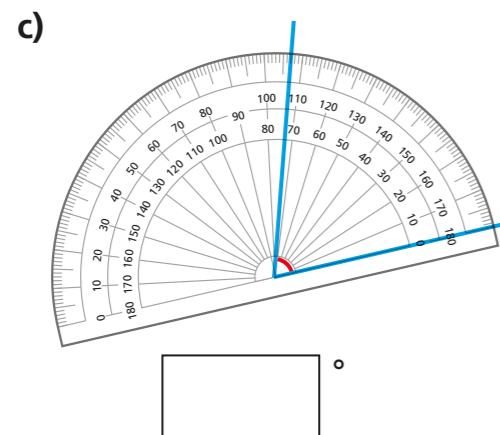

D

How did you decide the correct order?

4 What is the size of the angle marked in each diagram?

5 Use a protractor to measure the angles and label them on the diagrams.

6 Look at the diagram.

a) What is the smallest angle you can find in this diagram?

Label it on the diagram. What does the angle measure? °

b) Find an angle between 70° and 90°.

Mark it on the diagram. What does the angle measure? °

c) Measure and label three more angles on the diagram.
