$$2+2=4$$

Fluency

Measure capacity 1

2. Find the capacity and volume of each container.

Capacity = _____

Volume = _____

Capacity = _____

Volume = _____

Capacity = _____

Volume = _____

Measure capacity 1

3. Find the capacity and volume of each container.

Capacity = _____

Volume = _____

Capacity = _____

Volume = _____

Capacity = _____

Volume = _____

Measure capacity 1

Problem solving

4. Use the clues to work out who has which container.

Patrick says: "I have between 10ml and 20ml."

Remi says: "I have the most liquid."

Joel says: "I have 10ml."

Patrick = _____

Remi = _____

Joel = _____

Measure capacity 1

Odd one out

5. Which jug is the odd one out and why?

Measure capacity 1

Explanation

6. Freya says "There is more water in A because it is taller." Do you agree with Freya?

Explain why.
