

Computing		Year 6 Autumn Term Communicating text and images	
Logo and Poster Design		Knowledge	Vocabulary
Simple	Simple logos are the ones people can recognize as soon as they see them. <ul style="list-style-type: none"> • Few words • Bold Text • Strong colours 	Brand 	Design: purposefully considering what something looks like. Raster graphic: a pattern of closely spaced rows of dots that form an image
Scalable	A great logo should be simple enough to be able to be scaled down or up and still look good. <ul style="list-style-type: none"> • Vector graphics 	Programs 	Vector: a computer image that is stored in memory as lines rather than a series of dots, allowing it to be rotated or proportionally scaled. Format: a defined structure for the processing, storage, or display of data.
Memorable/Impactful	If people cannot remember it, the logo has not done its job!	Brand 	- JPEG files are images that can be easily copied and pasted - PNG image files can have transparent backgrounds, which lets you load them onto programs such as Scratch and use them as characters (without borders around the edge)
Versatile	It can be used on poster, packaging or digitally and still work well. <ul style="list-style-type: none"> • Clear contrast between text and background 	Programs 	- GIF files can be moving pictures, which can make short videos (very popular on social media)
Relevant	Make people think of the product that they are linked to. <ul style="list-style-type: none"> • Clear pictures • Repeating pictures • Clear tag line 	Recall: Can you remember what these words mean? Website Internet Browser	- MP3 files are compressed sound files, that take up less memory - WAV files are very large and high quality sound files
