

The smallest number Chloe could be thinking of is 2,011. $2011 \times 51 = 102,561$ so Chloe's 6 digit number is 102,561.

Teddy has spilt some paint on his calculation.

		2		6	9
x				2	
	2	2	9	5	2
	15	17	13		0
		0	3	3	2

What are the missing digits?

What do you notice?

The missing digits are all 8
