STEPS TO SUCCESS

1) Draw your grid – ensure there is enough space for all the partitioned numbers (e.g. 16 x 3)
2) First, put the multiplication sign (x) in the top left corner.
3) Then write the single digit across the top
4) Partition the 2 digit number and write it down the side.
5) Multiply the 10s
6) Multiply the 1s
7) Add the answers together.

X	3
10	30
6	18
	48
