Dexter says,

$$4 \times 21 = 2 \times 42$$

Is Dexter correct?

Yes because 21 is half of 42

4 x 21 = 84

2 x 42 = 84

Teddy completes the same calculation as Alex.
Can you spot and explain his mistake?

Teddy has put the 80 in the hundreds column. He needs to leave out the zero and remember that 8 Tens = 80
