

MONDAY CHALLENGE

Dora and Eva are planting bulbs.
They have 76 bulbs altogether.

Dora plants her bulbs in rows of 8 and
has 4 left over.

Eva plants her bulbs in rows of 10 and
has 2 left over.

How many bulbs do they each have?

Which calculation is the odd one out?
Explain your thinking.

$$64 \div 8$$

$$77 \div 4$$

$$49 \div 6$$

$$65 \div 3$$
