

Lesson 1

L.O. To name and describe the features of rivers.

Task 1) Watch the video about rivers.

[Rivers - class clips](#)

After watching can you explain to a grown up / sibling what the following features of a river are:

Source

River mouth

Which is higher? The river source or the river mouth? What important fact about water helps you remember this? 

Task 2) Look through the PowerPoint, pay close attention to the pictures and the different features of rivers.

If you have time you can cut up the pictures and definitions to see if you can match them back up again! (Lesson 1 River features to mix and match)

Label the river features on your diagram. (Lesson 1 River features to label)

CHALLENGE: Add extra information from the video and PowerPoint to each definition.

SUPPORT: The initial letter for each feature is given on this sheet. (Lesson 1 River features to label SUPPORT)

Optional challenges.

1) Track the course of the river Sheaf on a map. Can you find its source and river mouth?

2) Create a model of your river in lego / playdough then label the different features or create a video to describe it.
