

# Find the Mixed Equivalent Fractions

LO: I can write the equivalent fraction.

Fill in the numerator to make the fractions equivalent.

1.

$$\frac{1}{2} = \frac{\square}{4}$$

2.

$$\frac{1}{12} = \frac{\square}{24}$$

3.

$$\frac{1}{10} = \frac{\square}{20}$$

4.

$$\frac{1}{8} = \frac{\square}{16}$$

5.

$$\frac{3}{20} = \frac{\square}{40}$$

6.

$$\frac{1}{6} = \frac{\square}{12}$$

7.

$$\frac{1}{5} = \frac{\square}{10}$$

8.

$$\frac{1}{4} = \frac{\square}{16}$$

9.

$$\frac{3}{10} = \frac{\square}{20}$$

10.

$$\frac{1}{3} = \frac{\square}{12}$$

11.

$$\frac{7}{20} = \frac{\square}{40}$$

12.

$$\frac{3}{8} = \frac{\square}{16}$$

13.

$$\frac{2}{5} = \frac{\square}{20}$$

14.

$$\frac{5}{12} = \frac{\square}{24}$$

15.

$$\frac{19}{20} = \frac{\square}{40}$$

16.

$$\frac{3}{5} = \frac{\square}{20}$$

17.

$$\frac{5}{8} = \frac{\square}{16}$$

18.

$$\frac{2}{3} = \frac{\square}{6}$$

19.

$$\frac{3}{4} = \frac{\square}{8}$$

20.

$$\frac{4}{5} = \frac{\square}{10}$$

21.

$$\frac{5}{6} = \frac{\square}{12}$$

22.

$$\frac{7}{8} = \frac{\square}{16}$$

23.

$$\frac{9}{10} = \frac{\square}{40}$$

24.

$$\frac{11}{12} = \frac{\square}{24}$$

# Find the Equivalent Fractions **Answers**

Fill in the numerator to make the fractions equivalent.

Question	Answer
1	2
2	2
3	2
4	2
5	6
6	2
7	2
8	4
9	6
10	4
11	14
12	6

Question	Answer
13	8
14	10
15	38
16	12
17	10
18	4
19	6
20	8
21	10
22	14
23	36
24	22
