

# Life Cycle of a Flowering Plant

Can you cut and stick the descriptions and pictures to the correct stage of the life cycle?

<p>The plant grows bigger and forms a flower.</p>	<p>The fully formed seeds are moved away from the parent plant.</p>	<p>The seed starts to grow.</p>	<p>The pollen joins with an ovule and a seed starts to form.</p>	<p>Pollen from the anther lands on the stigma and travels down the style.</p>
